

# Calendar Date Input Crib Sheet

## Calendar Input

Follow guidance for Date Display

Display the appropriate value in the Free-Text field following selection of a date

**Month** allow a month to be selected independently and use styling or a button to show that it can be selected

Show **Days of the week**

Provide a visual indication of the current date

Provide a button for entering today's date

Allow the calendar to be closed by clicking away or clicking on the calendar icon

**Year** allow a year to be selected independently and use styling or a button to show that it can be selected

Select a month or year by clicking in the header or select a day by clicking on a date from the calendar below.

Provide access to relevant instructional text and ensure that months and years have descriptive tooltips

Provide a link or button to close the control

Ensure that the control can be operated effectively using the keyboard
